

Troop 1148 constructed the Butterfly Garden and this pamphlet for our Silver Award. Our goal was to construct a nurturing environment for butterflies, educate the public about butterflies and what attracts them and to make an enjoyable garden for visitors of Dyken Pond Center. The Silver Award is the second highest award achievable by Girl Scouts and requires 50 hours of community service along with leadership, responsibility and character traits. This award is not only a great honor to receive, but also a wonderful experience for anyone who participates.

We would like to thank....
